"Federal, state, regional, or local entities within the Permit Boundaries, not currently named in this permit, may operate storm drain facilities and/or discharge storm water to the storm drains covered by this Order. The Permittee may lack legal jurisdiction over these entities under applicable state and federal authorities. Consequently, the Central Coast Regional Water Quality Control Board recognizes that the Permittee shall not be held responsible for such facilities and/or discharges.

The State Board and the Central Coast Regional Water Quality Control Board may consider issuing separate NPDES storm water permits to other federal, state, or regional entities operating and discharging within the Permit boundaries that may not be subject to direct regulation by the Permittee."
